## Spot Daily Trend Master program

Eleven US\$ crosses (9 currencies, xau and xag) are run in our slow trend following model using daily data analysis. Each curpair receives the same allocation. The maximum allowed net exposure (=leverage) is 4 times AuM but an investor can lower or raise this to suit his risk appetite. Performance needs to be adapted lineary. Trading costs on this very low trading frequency model have not been discounted, but are rather negligable.

Fees are negotiable

## ABOUT TSA-EUROPE

Founded in 2005 by Marc Verleysen.

TSA-Europe is a fully automated, systematic trading advisor that uses the price of the underlying asset as the only input for the model.

TSA-Europe has been elected as trading advisor by a mid-size German bank from 2007 to 2015.

TSA-Europe was in the final four of a prestigious competition in Germany (2009) where 130 new strategies competed for a mandate from a multi billion euro hedge fund.

TSA-Europe has been elected by several start-up hedge funds and managed accounts managers to provide an FX trading strategy in a fully automated format
