THE BALANCED R6 PROGRAM

A rotation system selects at the start of each month, **6** currency pairs (hence **R6**) out of the 17 that are tracked in the Balanced model. The selection criterion is the performance in the previous three months of those currency pairs where the best is selected as well as the five worst performers (mean reverting principle).

Maximum allowed exposure is 4 times AuM.

Investors with different risk profile need to adjust performance lineary.

Trading costs : \$ 100 per \$ 1 mio traded
